DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a tablet composition of amlodipine free base, classified in class 424, 514 and various subclass.
- II. Claims 11, 28 and 13 in part, drawn to amlodipine of the form II and a process of making it, classified in class 546 and various subclass.
- III. Claim 12, drawn to a method of treating a disease using amlodipine, classified in class 514 and various subclass.
- IV. Claims 13-27,29, drawn to a process of making amlopidine free base, classified in class 546 and various subclasses.
- V. Claims 30,31 drawn to a purification method of amlopidine free base, classified in class 546 and various subclass.
- VI. Claim32-34, drawn to a population of particulate amlopidine free base, classified in class 546 and various subclasses.

The inventions are distinct, each from the other because of the following reasons:

Inventions I -VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. Amlopidine free base is known.

Invention I is drawn to a tablet compositions,

Application/Control Number: 10/024,520

Art Unit: 1625

Invention III is drawn to a method of treating,

Invention IV is drawn to a process of making them.

Invention II is drawn to a different form II and a method of making it.

Invention V is drawn to method of purification and

Invention VI is drawn to a particular particulate size.

All these are different functions and inventions are independent and distinct and the search is burdensome since amlopidine free base is a known compound.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II- VI, restriction for examination purposes as indicated is proper.

An attempt was made to call was made to Mark Buscher on 7/15/2002 to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
